

EXPOY RESIN SEALED SOLAR PANEL

Main Characteristic of Mini Solar Panel:

1. The mini epoxy solar panels are made of monocrystalline or polycrystalline silicone. The encapsulation materials are made of special epoxy resin. Characterized by anti-humidity, insulation, excellent transperence and anti-aging,as well as smoothness, no bubble and neat appearance.
2. They can be widely used in solar lawn lamps, solar toys, solar chargers and solar signal lights.
3. We can customize carious styles and specifications of epoxy encapsulated solar panels according to your requirements.

Item No	MaxPower(W)	Dim(mm)	Max(MA)	Max Vol(V)	Short Circuit Current(MA)	Open Circuit Voltage(V)
